Acceleration of hydrogen infrastructure until 2030

The 2030 vision shows an **Acceleration** of hydrogen infrastructure to enable the emergence of **pan-European supply and import corridors** by 2030. Resulting in a total length of

~28,000 km

The emergence of **5** corridors enable hydrogen imports from **5** distinct export regions

To support the **EC's ambition** to promote the development of **20 Mt** renewable and low carbon hydrogen market in Europe
